

ABRS Guidelines Test Booklets

Tests 1-10 & Lunge Unit

The ABRS have produced these Guidelines to help both teachers and clients in their preparation for ABRS Equitation and Stable Management Tests 1 – 10.

They are designed to encourage all those who have an association with horses and ponies to learn and become competent, not only in equitation, but also in the animal's care and welfare.

There is also a risk element in any sport and one involving animals will increase that risk unless the participants are taught how to handle the animals and how to use and check the equipment involved e.g. tack.

This takes time and continual practice, until a degree of competence is reached.
